

## Post Base Price List

10921.00

### ***Post Base, height adjustable from 142 mm to 207 mm***

Bearing Plate @ top (wood):

Ø 100 mm x 6 mm thick, with  
four (4) pre-drilled holes Ø 12 mm

Bearing Plate @ bottom (concrete/steel/...):

160 mm x 100 mm x 6 mm thick, with  
four (4) pre-drilled holes Ø 13 mm

M24 all thread-rod 65 mm long @ top and bottom

**ZiNiP**<sup>®</sup> - coated (see reverse)

Price: CDN \$ 47.70

10930.10

### ***Post Base, height adjustable from 110 mm to 200 mm***

Bearing Plate @ top (wood):

Ø 100 mm x 8 mm thick, with  
four (4) pre-drilled holes Ø 12 mm

Bearing Plate @ bottom (concrete/steel/...):

160 mm x 100 mm x 8 mm thick, with  
four (4) pre-drilled holes Ø 13 mm

M24 all thread-rod 35 mm long @ bottom and 150 mm long @ top

Pipe Ø 42.4 mm x 130 mm long

**ZiNiP**<sup>®</sup> - coated (see reverse)

Price: CDN \$ 59.96

**HECO-Topix self-tapping fully threaded wood screws , for use with PITZL Post Base**

Ø 10 mm | available in two (2) different length | two (2) different head types

HECO-Topix 10 x 120 mm w/ counter-sunk head	Price: CDN \$ 152.87 / 100
HECO-Topix 10 x 160 mm w/ counter-sunk head	Price: CDN \$ 218.39 / 100
HECO-Topix 10 x 120 mm w/ flange head	Price: CDN \$ 160.50 / 100
HECO-Topix 10 x 160mm w/ flange head	Price: CDN \$ 229.32 / 100

**ZiNiP®- coating**

Ever increasing environmental effects like pollution also requires tougher, more durable corrosion protection for exposed steel connectors in timber construction.

The new ZiNiP coating used for our post base connectors is a multi layer process that adds toughness to the coating as well as a thicker protection. The multi layer process ensures that even if one layer gets damaged, the entire protection is not as it would be the case with galvanized finishes.

The following images show various levels of corrosion after different exposure times to a salt-mist spray test.

Galvanized | 240 hours  
("red"-rust)

Hot-dip galvanized | 408 hours  
("white"-rust)

ZiNiP® coated | 1500 hours  
(no rust)
